THE NEXT GENERATION OF FRONTLINE RADIOS, NOW FREE

**Lifetime Radios to Keep
your Frontline Connected**

The Next Generation of Industrial Radios, Now Free

**Never Buy a Radio Again.
Order Now.**

After no innovation for industrial radios in over 80 years, we're saying enough is enough. Enough of the high costs, zero visibility and basic push-to-talk devices keeping your workforce from performing their best. Whether it's your first time getting radios for your crew, you're expanding your enterprise, or just wanting to replace your current dumb devices, achieve site-wide visibility and multimedia communication today with weavix™.

Now's the time to get smarter about your worker collaboration. walt™ Smart Radios are in stock and ready to be shipped. Now is your chance to deploy industry's best radio, **risk-free** for your entire enterprise.

walt™ is what they want.

INSTANT COLLABORATION

Features to Push your Frontline Further

Communication is vital for your frontline to stay productive and informed at all times. weavix™ uses the best-in-class features to ensure workers are always connected, no matter where they are or what they're working on. Now, your entire organization can work together without being limited to only push-to-talk communications.

THE NEXT GEN OF PUSH-TO-TALK

Enterprise Vital Push-to-Three

Push-to-talk forever changed how the frontline workforce works together. Now, it's only the beginning. We know how important every communication is to your enterprise, so we've made the latest capabilities all available at the push of a button. Enterprise-Vital Push-to-Three (EVPT3) combines three of the most popular and useful communication methods to drive on-site communication, safety and productivity, and transform the frontline workforce like never before.

Talk

Send crisp & clear voice messages at the push of a button.

Picture

Snap, send & receive images for quick visualization.

Video

Easily collaborate face-to-face, even when you're not.

Sharpen your Competitive Edge

Purpose-Built Capabilities to Drive Teamwork & Productivity

Sporting its modular, frontline-friendly design, walt™ smart radios are built to work as hard as your workers do. With a rugged, comfortable design, walt™ maintains the shape and size of legacy radios, meaning he can fit in with any crew without issue, all at no cost to you.

- Analog Interoperability - RoIP

Intact Battery, Uncompromised Quality

Every walt™ smart radio has a Class 1 Div. 2, IP68 and ATEX 212 safety rating. They're purpose-built, meaning they can survive and, more importantly, work in almost any environment in an industrial setting. The durable casing of walt™ always keeps its powerful battery in place, no matter how hard of a fall it takes.

- **It's Safer - No Concern of Battery Fall-Out**
- **They're Disposable - Replace Device as Needed**
- **There's No Added Cost to You - weCare™ Covers Every Device**
- **Easier to Use on the Frontline - Grab & Go Communal Usage**
- **Purpose-Built Design - Withstand Tough Work Environments**

Charging for the Masses

Ensure maximum collaboration and optimum battery life with a fully charged device. Every walt™ can be charged individually through a USB-C or by placing it on our mass charger. Our wrangler™ Mass Charging Cradle effortlessly and simultaneously charges up to five walt™ smart radios to full battery power. The slim product size and modular design allows for rack ability and the ultimate flexibility in charging station options.

Hear and Be Heard Clearly

Featuring state-of-the-art noise cancellation technology, the weavix™ speaker mic was built to use in loud environments. Its high-output, front-firing speaker allows workers to hear, no matter what's going on around them. The sealed, rugged housing is water and wind shielding, drastically decreasing outside noise caused by winds and harsh weather. Each speaker mic comes with a secure hook for workers to wear it how they want. Or workers can utilize bluetooth accessories at their preference.

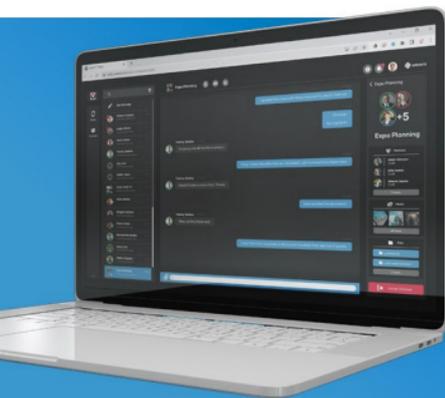

walt™ Seamlessly Communicates Across the weavix™ Platform

MOBILE APP

Take weavix™ On-the-Go

Available on Android and IOS, the weavix™ mobile app lets you take the power of weavix™ with you wherever you go. We've made it convenient to collaborate with your frontline from anywhere using any mobile device.

WEB CONSOLE

Collaborate from your Office

weavix™ bridges the gap between the deskless and deskbound workforces for collaboration that pushes your enterprise farther. Using the web console, you can work alongside your frontline crews as you normally would, just from the comfort of your office.

Directory

Global Directory

FIND AND CONNECT WITH WORKERS IN THE PLATFORM

With a configurable global directory of every user, weavix™ allows you and your crews to invite others to connect. Depending on your facility's configuration, you can invite workers from inside and out of your organization to join and securely communicate. This makes managing and integrating multi-company labor into your workforce seamless and efficient.

To benefit your frontline workers, weavix™ is packed with worker-optimized features and guaranteed solutions for a truly collaborative workforce.

Knock out Language Barriers with Ease

Language barriers are a global challenge for frontlines, keeping them from performing at their best. With up to a 90% translation accuracy rate, language barriers don't stand a chance against weavix™. Every walt™ comes integrated with language translation and dictation functionality, capable of translating between any of the major languages without the need of any third-party applications. With walt™ on your frontline, you can rest assured that every worker is connected, no matter the language.

Device Management

Locate Any walt™ Anonymously Throughout your Facility

walt™ goes with your crews wherever they need to go in order to get work done. That doesn't mean it always makes it back with them. weavix™ makes it easy to keep track of your devices. Within our platform, you can locate and retrieve any walt™ on your premises, no matter where your crews might've left it.

Find walt™ From Your Computer or Phone

Your walt™ can get lost anywhere in your facility, but finding it just got a lot easier. Using the mobile app or online console, weavix™ shows you exactly where in your facility your walt™ is with pinpoint accuracy.

See walt™ on a Map

weavix™ only works in your facility, so a walt™ can't get too far. With a map of your facility, you can locate and retrieve your walt™ faster and without wasting any additional time or manpower.

Know the Last Person to Use it

weavix™ keeps a record of who was the last to login and use each device. If you notice a missing walt™ in your fleet or find one and want to ensure its owner is safe, use our platform to perform your due diligence.

Whatever the Network, weavix™ Works your Way

weavix™ operates on any existing digital network infrastructure, including public LTE and Wi-Fi. If you're ready to upgrade your network, we can design and deploy a private LTE (PLTE) network specifically built to suit your facility.

 PUBLIC LTE  PRIVATE LTE  WI-FI

Secure & Reliable Coverage with weavix™ Deployed PLTE

Your communications are only as good as your network. Using a weavix™ deployed PLTE network, keep your workers connected 24/7 from anywhere in your facility and downtime to a minimum with multiple redundancies, all covered under an SLA.

BENEFITS OF PRIVATE LTE:

- ✓ Wider Range
- ✓ Higher Security
- ✓ Lower Costs
- ✓ Greater Privacy
- ✓ More Control
- ✓ Higher Capacity

Prepared for Any Situation

If your network goes down, that doesn't mean your frontline has to halt production. With FRS back up, all walt™ smart radios can remain connected while the network gets restored. With secure encryption and a varying range between 1.5- and 2-mile radius, depending on the facility infrastructure, weavix™ keeps your operations up, even if your network goes down.

Analog Goes Digital with RoIP

For the facilities working on an LMR system, weavix™ connects every worker using Radio over IP (RoIP). Whether you've yet to make the switch to a digital network or just updated your analog system, RoIP gives your frontlines the security, reliability and connectivity of weavix™ digital communication.

walt™ for Every Worker Because weCare™

Get Upgrades, Repairs, Maintenance and More at No Additional Cost

Every walt™ comes fully equipped with the latest in communication innovations, but weavix™ doesn't stop once they're deployed. With our managed service plan, weavix™ offers infrastructure coverage assurance to all devices implemented on your frontline. Every walt™ and your weavix™ deployed private LTE network, no matter the size of your organization, is protected at no additional cost to you.

Continuous coverage, along with repairs, replacements, upgrades and more, for the lifetime of your weavix™ subscription.

Repair and Replace your Devices

As your enterprise continues growing, weavix™ ensures every worker always has a working walt™. weCare™ manages the repairs and replacements of any walt™ as you need them. Let us worry about your radios, so you can stay focused on your organization.

Upgrade your Crews

Rest easy knowing you have the most up-to-date equipment for your frontline. As our devices evolve with the needs of the frontline workforce, weCare™ ensures you and your frontline evolves with us. Know you always have the latest weavix™ has to offer with weCare™.

Guaranteed Coverage

In case your network crashes, weavix™ doesn't leave your crews without a backup plan. GMRS Radio Backup is built in through an optional antenna on all walt™ smart radios allowing communication to still happen. weavix™ maintains an encrypted connection between all walt™ smart radios between 1.5 to 2-mile radius, depending on facility infrastructure.

Made Possible with the Internet of Workers™

The **Internet of Workers™** is uniquely designed for the frontline workforce, offering a competitive advantage for those out in the field. Just like how IoT builds new technology to digitally transform machines, **IoW** does the same but at the benefit of the human worker.

Rather than an "automation first" concentration, **IoW** engages the workforce with an entire ecosystem of digital connectivity. Enhanced productivity, collaboration and safety within the workplace is made possible only with the **weavix™** **IoW** platform.
